

LETTER OF RECOMMENDATION

I am pleased to recommend XXXXXXXX for the masters program at your university. I have known XXXX for past three years teaching him courses in Applied Thermodynamics, Thermal Engineering and Fluid Mechanics. I have also supervised his laboratory work for these subjects. During this time I have had interactions with XXXXXXXX commitment to his work and his desire to achieve excellence in whatever he undertakes.

In all my classes, XXXX has been an active participant in classroom discussions and has excelled in all the subjects that I have taught him, constantly securing above 65 percent. He has always submitted his assignments and project reports well before deadlines and he is well focused with a keen interest in the practical application of the subject. His thought of relating everything taught in class with practical situations happening everyday has strengthened his base. So, his knowledge of the subjects of dynamics is extremely thorough. He has successfully been part of the student council as the cultural secretary of the college and has represented the college and organized events and festivals exceptionally well.

I believe that XXXX stronghold on the subjects of fluid mechanics, thermodynamics and heat-mass transfer will hold him well in his stride. He has spoken to me about his dream of pursuing his goal and dream subject in detail, and I also believe that he has the required knowledge and skill set to excel in this course. He will do well in this course and will blend well into the new environment. Hence, I strongly recommend him for admission to your university.

Sincerely,

Professor's name

Assistant professor (XXXXXXX Department)

XXXXXXX College of Engineering

Gujarat Technological University
